THE RIGHT SOLUTION FOR ENHANCING WINDOW PERFORMANCE

Various Independent Sources Estimate

- 20% to 40% of the energy used to cool buildings is caused by solar heat gain through windows.
- Three-fourths of all existing windows are energy inefficient.

Enhancing window performance can significantly improve building energy efficiency.

CPFilms' Energy-Control Window Film Offers

- Whole-building energy savings of 5% to 10%.
- Paybacks in four years or less in many cases.
- Improved occupant comfort and building aesthetics.
- Assistance qualifying for Green Building Certification (up to seven points for LEED Certification).
- Protection from terrorist events and electronic eavesdropping.
- Reduced glare.
- Occupant and furnishing ultraviolet protection.

CPFilms Energy Solutions

has successfully collaborated with many energy service and energy management companies — working with their school, college, university, hospital, commercial office, and government customers.

CPFilms offers global sales and engineering support by an experienced staff of energy professionals.

CPFilms (a unit of Solutia), an ISO 9001 certified company, proudly manufactures and distributes LLumar Window Film and Vista Window Film. **For more information: energysolutions@cpfilms.com**
